---

Across the range.
Quality guaranteed.
The economic advantages are clear.
A need for reprocessing, maintenance or repairs, they contribute to optimising...

The advantages for precision handling are at your fingertips.

...Our features:

- Single-use instruments have lower capital investment and purchasing costs when Sentina single-use instruments are used compared to reusable instruments.
- No reprocessing and documentation of Sentina single-use instruments is up to 99% recyclable.
- No maintenance, repair or reprocessing costs (no reprocessing and documentation of reusable instruments).
- No costs for the replacement of reusable instruments.
- Consistent product quality.
- Simple disposal, minimised waste streams in accordance with the waste disposal regulations of the industry.
- No environmental considerations, as the steel is retrieved by a magnetic separator and can be used to produce new products (returned to materials cycle).
- Easy to assign directly to the cost centre and direct cost allocation.
- No loss of value in the sterile, individually packed product. (returned to materials cycle)

Sentina single-use instruments are always tight and organically organised waste disposal scheme.

For reprocessing.
